Feedback (From last presentation)

→ **Void:**
    ↳ Jump and Launch: "Very nice. Very simple and easy to understand."

→ **Bug:**
    ↳ Professor: Sample game would be nice so users can get a taste of the product before creating accounts and joining.

→ **Enhancement:**
    ↳ *Short Term:*
        ○ GeoUnity: Allow users to join with a code (even with no account)
    ↳ *Long Term:*
        ○ Jump and Launch: Let people change backgrounds on quizzes (instead of using a fixed color)
            1. Not a priority for product functionality, but a great idea going forward
