- The site will be deployed using Heroku
- Docker will be used to run and host backend

Partner Teams

Previous Teams:

- **Week 3:** Beyond Bottles
- **Week 5:** GeoUnity
- **Week 7:** Jump and Launch
- **Week 9:** GeoUnity

Current Team:

- **Week 11:** Jump and Launch

Issues/Feedback

- JAL
  - "Mobile Friendly? ("On the go" kind of website)"
    - Long-term enhancement
  - "Renaming the title of the website from "React App" to [your game's name]?"
    - Short-term enhancement
      - just a quick thing that we missed changing
- GeoUnity
  - "Maybe the UI could reflect more how it is evaluating Map quizzes - there could be maps, or geography in the background"
    - Short-term enhancement
      - Could manipulate the UI a bit more to reflect the topic aside from just the name and logo
        - E.g. change button shapes
