Current Team:

- **Week 9:** GeoUnity

Issues/Feedback

- Problem with build where package.json file and node-modules directory had to be deleted before the build commands were run for the project to be built properly
  - Updated docs/expert_users/README.md to include the steps to resolve this scenario
  - Seemed to be a one-off issue
- Visibility of other user profiles from the leaderboard
  - Long-term enhancement
- Possibly add a graph representation of game history, scores
  - Long-term enhancement
- Explain tokens feature to users prior to account creation
  - Short-term enhancement
